

STRATEGIC PARTNERSHIP

ABOUT PLANIXS

Planix, founded in 2011, offers a unique suite of modular tools that help banks manage their money more effectively. Through their Realiti® platform, they provide forecasting, regulatory reporting, intraday reconciliation, payment control, collateral management, and more to major banks and financial institutions, including Lloyds, Santander, and Barclays.

CHALLENGE: SCALING UP STRATEGICALLY

During its aggressive growth period, Planix needed to recruit senior management and fully capable scrum teams, composed of Developers, Business Analysts, and Testers. They required a reliable talent partner with experience in the industry to support their expansion plans.

SOLUTION: STRATEGIC PARTNERSHIP

BrightBox was selected as Planix's partner of choice, given their history and experience in the field. Over the last two years, BrightBox acted as Planix's internal recruitment partner, deploying a senior consultant to manage all live roles, arrange a PSL, and onboard candidates with a focus on culture-fit. This strategic partnership allowed Planix to double its workforce and successfully deliver services to key clients such as Barclays and Lloyds.

RESULTS

BrightBox's collaboration with Planix has significantly contributed to their ongoing success, and the relationship between the two companies continues to strengthen.
